

## Flexible Cellular Uplink Enclosure Attaches to Any Vehicle

- Flexible – Leverages the modularity of the TVUPack TM8200 to ensure optimal RF environment for use in moving vehicles
- Cost effective – Eliminates the need for additional modems or antennas
- Simple – MARC-1 is easy to use and sets up in seconds

TVU MARC-1 is a weather-resistant enclosure for the TVUPack TM8200's detachable modem module. MARC-1 extends the flexibility of the TM8200, enabling users to move the modem enclosure to the roof of a vehicle for optimal RF performance without requiring the use of additional cellular modems or antennas. MARC-1's versatile and portable design enables field crews to mount the enclosure on any standard electronic newsgathering (ENG) vehicle in a wide range of different configurations. The system can be permanently mounted to any standard ENG vehicle or can use optional magnetic connectors for safe and secure temporary use with multiple vehicles.

When mounted to the roof of an ENG vehicle, MARC-1 provides superior resiliency for the TVUPack's multiple 3G/4G/LTE connections and gives camera crews the ability to transmit live video with superior picture quality even while the vehicle is moving. MARC-1 can also be mounted to a free standing tripod, to allow field crews to move the TVUPack's modem module to locations with stronger bandwidth independently of the camera setup.

# Easy to Use

TVU's MARC-1 is a plug-and-play solution that can convert the TVUPack TM8200 from a backpack to a vehicle-mounted configuration within seconds. With the MARC-1, the TM8200 modem module is connected to the transmitter via a custom extended USB power cable without the need for additional power sources.

Remove the detachable modem module from the TVPack TM8200 backpack.

Place the modem module in the MARC-1 and attach the USB power cable.

Close and lock the MARC-1 enclosure.

# Technical Specifications

|                |  |
|----------------|--|
| Dimensions     | Diameter: 15 inches (38.1 cm)<br>Height: 4 inches (10.16 cm)   |
| Weight         | 7.5 lbs (3.4 kg)   |
| Connectors     | The MARC-1 connects the detachable modem module to the TVUPack TM8200 with an extended USB power cable.  |
| Configurations | Multiple mount points for permanent mounting to vehicles.<br>Magnetic attachments for temporary mounting to vehicles.<br>Tripod attachment for use outside of a vehicle. |
